When high speed cables such as Cat-5E, Cat-6, Augmented Cat-6 and optical fiber cables are installed, great care must be taken to insure proper cable management and performance.

Old technology 4 square boxes have been the only available products until now. These outdated boxes have proven to be seriously undersized for today's and tomorrow's technologies.

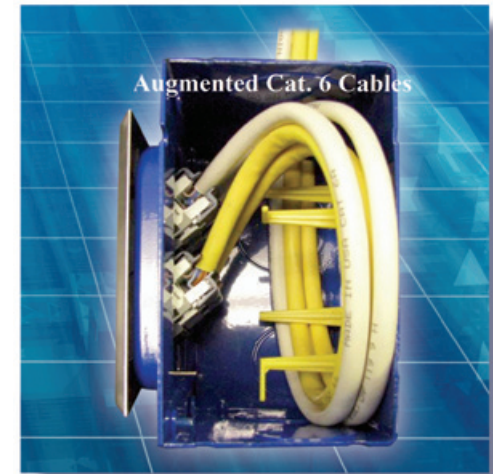

Today's data and video technologies and cables require strict adherence to cable manufacturers minimum bend radius specifications. The 5 Square Telecommunications Box is the only box that can facilitate these requirements and help future-proof your cabling system.

Tomorrow's technology can be installed today. Are you ready?

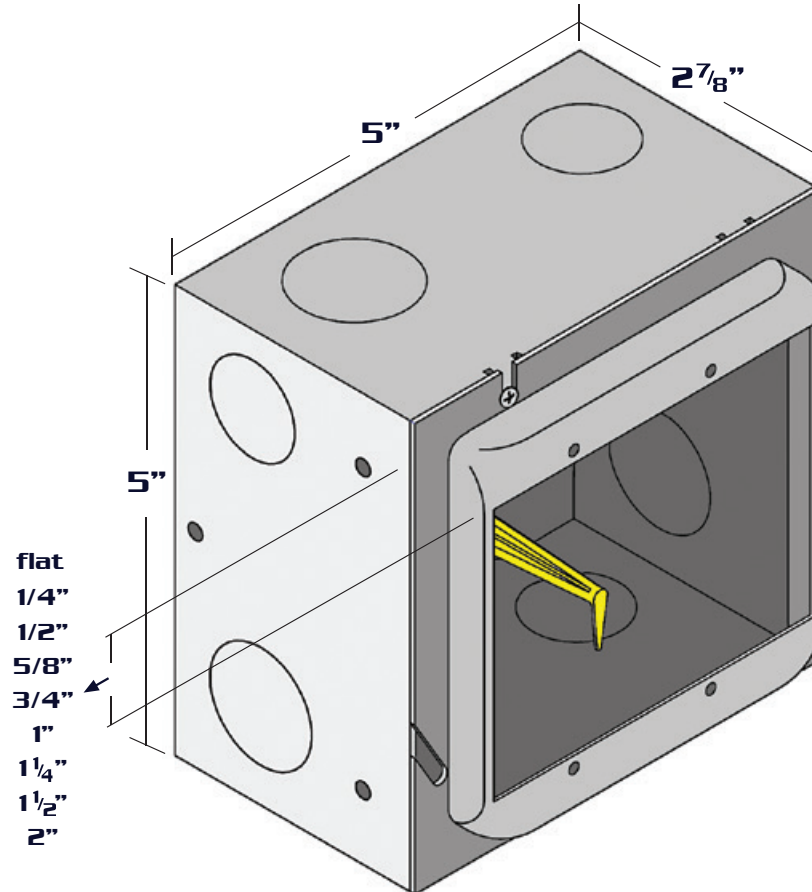

### The 5 Square's Unique Design:

- The only telecommunications outlet box with an integral cable management system
- Save labor, increase profits
- Facilitates minimum bend radius requirements
- Supports categories 5e, 6, Augmented 6, 7, Augmented 7 and optical fiber cables
- Assures a proper cable environment
- Supports PoE Plus
- Helps assure that evolving industry standards can be met as future cabling products are introduced

*Installation and troubleshooting is a breeze with the additional room provided by the 5 Square Box.*

With the 5 Square system, your next telecommunications installation may be the smoothest job ever.
